## WHITE-LABEL UCaaS PROVIDER PARTNERS WITH REDSHIFT NETWORKS TO DEPLOY CARRIER-GRADE UNIFIED COMMUNICATIONS THREAT MANAGEMENT BENEFITING REMOTE WORKFORCE

**SCOTTSDALE, ARIZONA - May 21, 2020**

**Reinvent Telecom**, a provider of a private-label unified communications and contact center as a service solutions, announced today that it has strengthened security for its real-time business VoIP, video, UC and collaboration services. This is an important timely addition for the rapid growth of **remote workers** in 2020.

“At Reinvent, we understand that today’s VoIP networks are as vulnerable to cyberattacks as data networks,” said Bill Bryant, President at Reinvent Telecom. “That’s why we’re doubling down on network security to give our partners and their customers the protection – and peace of mind – they deserve.”

The wholesale UCaaS Provider has deployed carrier-grade VoIP/SIP security, threat intelligence analytics and fraud-detection technology through a partnership with **RedShift Networks**, a global leader in cybersecurity solutions for communications service providers.

“We are very pleased to collaborate with Reinvent Telecom to help safeguard their **VoIP network** from fraudulent network traffic and cyberattacks,” said RedShift Network’s Vice President of North American Sales, Ray Muscatell. “The Reinvent team has a deep understanding of the real-time approach required to secure VoIP networks from the **always-changing cyberthreats** today and into the future. We look forward to strengthening our relationship as we continue applying Redshift UCTM’s advantages in defense against the constant threat of cyberattacks.”

RedShift’s **Unified Communications Threat Management (UCTM) solution** provides Reinvent with a Defense in Depth (DID) security architecture to protect against VoIP and SIP security attacks. UCTM provides real-time visibility into Reinvent’s VoIP network, enabling the carrier to immediately detect and automatically mitigate security attacks and fraudulent events.

UCTM also helps Reinvent protect its resellers’ customers from toll fraud, confidential information compromise and telephony Denial of Service (DoS) threats.

### About Reinvent Telecom

Reinvent Telecom, a division of Saddleback Communications, operates a private-label communications platform that empowers its wholesale partners to transform their businesses into next-generation cloud-based communications service providers. Reinvent enables its wholesale partners to deliver reliable, high-quality Unified Communications as a Service (UCaaS), Conferencing & Collaboration, Contact Center as a Service (CCaaS) and SIP trunking services. Reinvent’s solutions are all built on the proven platform from Metaswitch, a global leader in communications network software technology, and backed by Saddleback Communications, a stable, profitable Incumbent Local Exchange Carrier and a wholly owned enterprise of the Salt River Pima-Maricopa Indian Community (SRPMIC). Reinvent’s powerful turnkey solution is managed from quote to compensation through its proprietary Reinvent Partner Portal (RPP), enabling its wholesale partners to generate revenue quickly and build a successful cloud voice business while keeping full ownership and control of their customers.
